Application No. 10/824,983 Amendment Dated December 4, 2006 Reply to Office Action of October 16, 2006

Amendments to the Specification:

Please replace the abstract with the following amended paragraph:

A system and method for assessing a patient's risk of sudden cardiac death. One method of the invention can include acquiring patient data at one of a plurality of healthcare locations, identifying the patient as being worthy of an on-going sudden cardiac death risk assessment based on the acquired patient data, and performing the ongoing sudden cardiac death risk assessment whenever new patient data is acquired at any one of the plurality of healthcare locations.
